

PORTFOLIO

Portfolio created using terraform on AWS S3

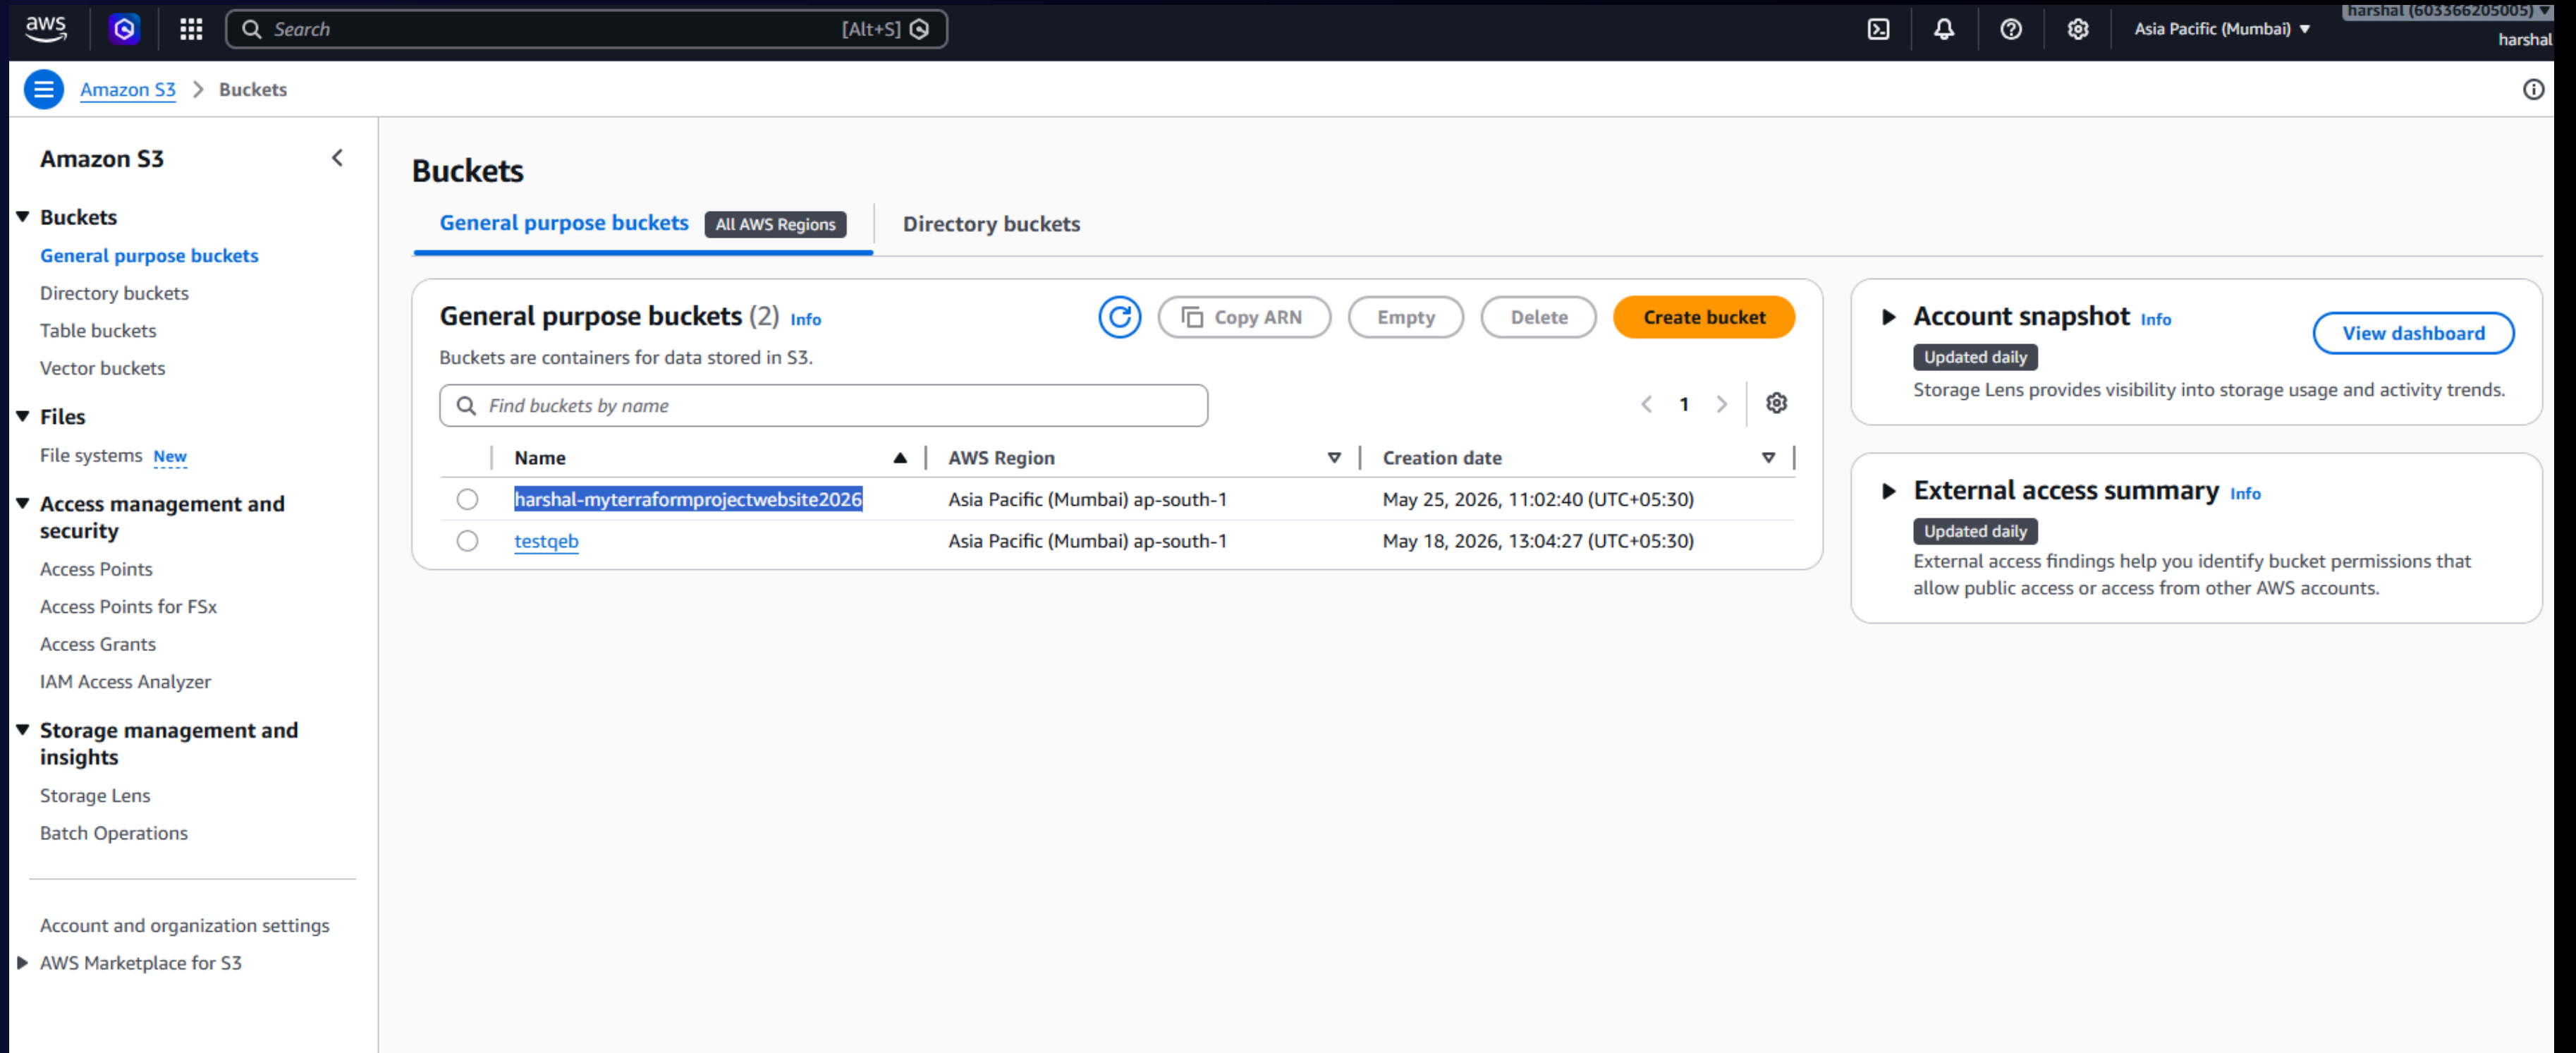

Files Used

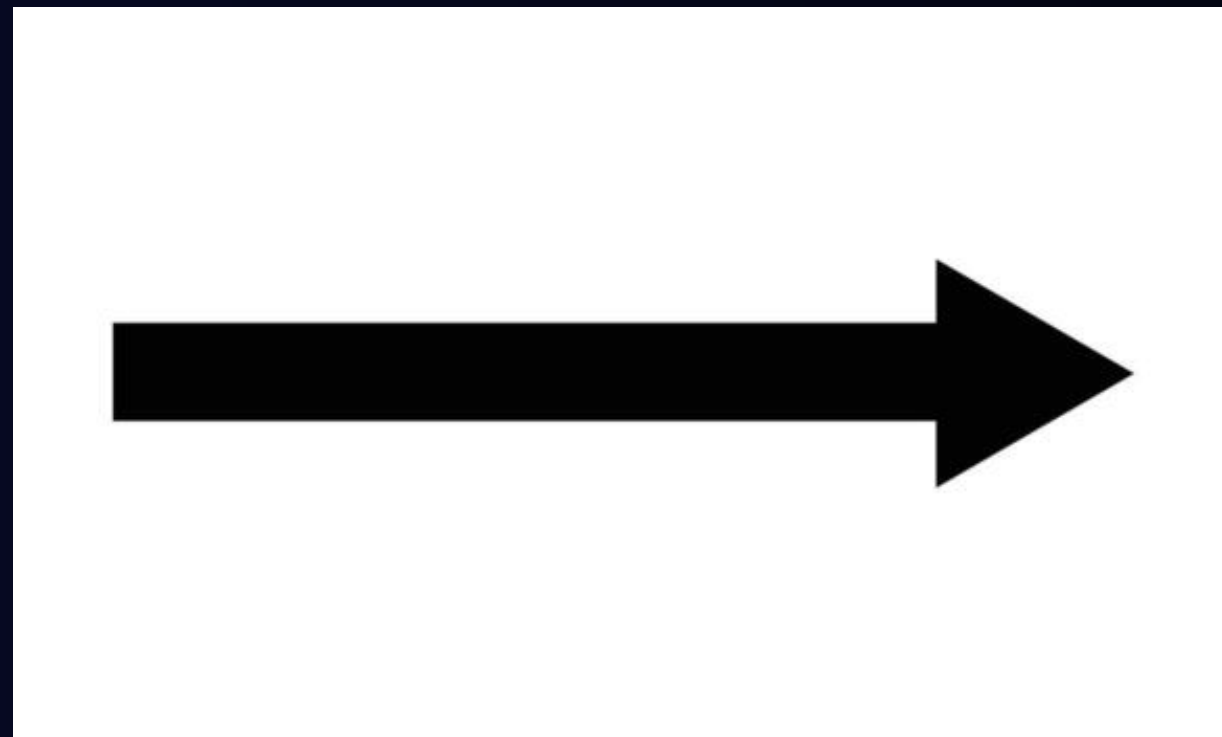

A screenshot of a file explorer interface with a dark background. It lists several files and folders. The file `main.tf` is highlighted with a light gray background. Icons to the left of the file names indicate their types: a folder icon for `.terraform`, a lock icon for `.terraform.lock.hcl`, a code icon for `error.html` and `index.html`, and a Terraform logo icon for `main.tf`, `provider.tf`, and `variables.tf`. The state files `terraform.tfstate` and `terraform.tfstate.backup` have a lock icon.

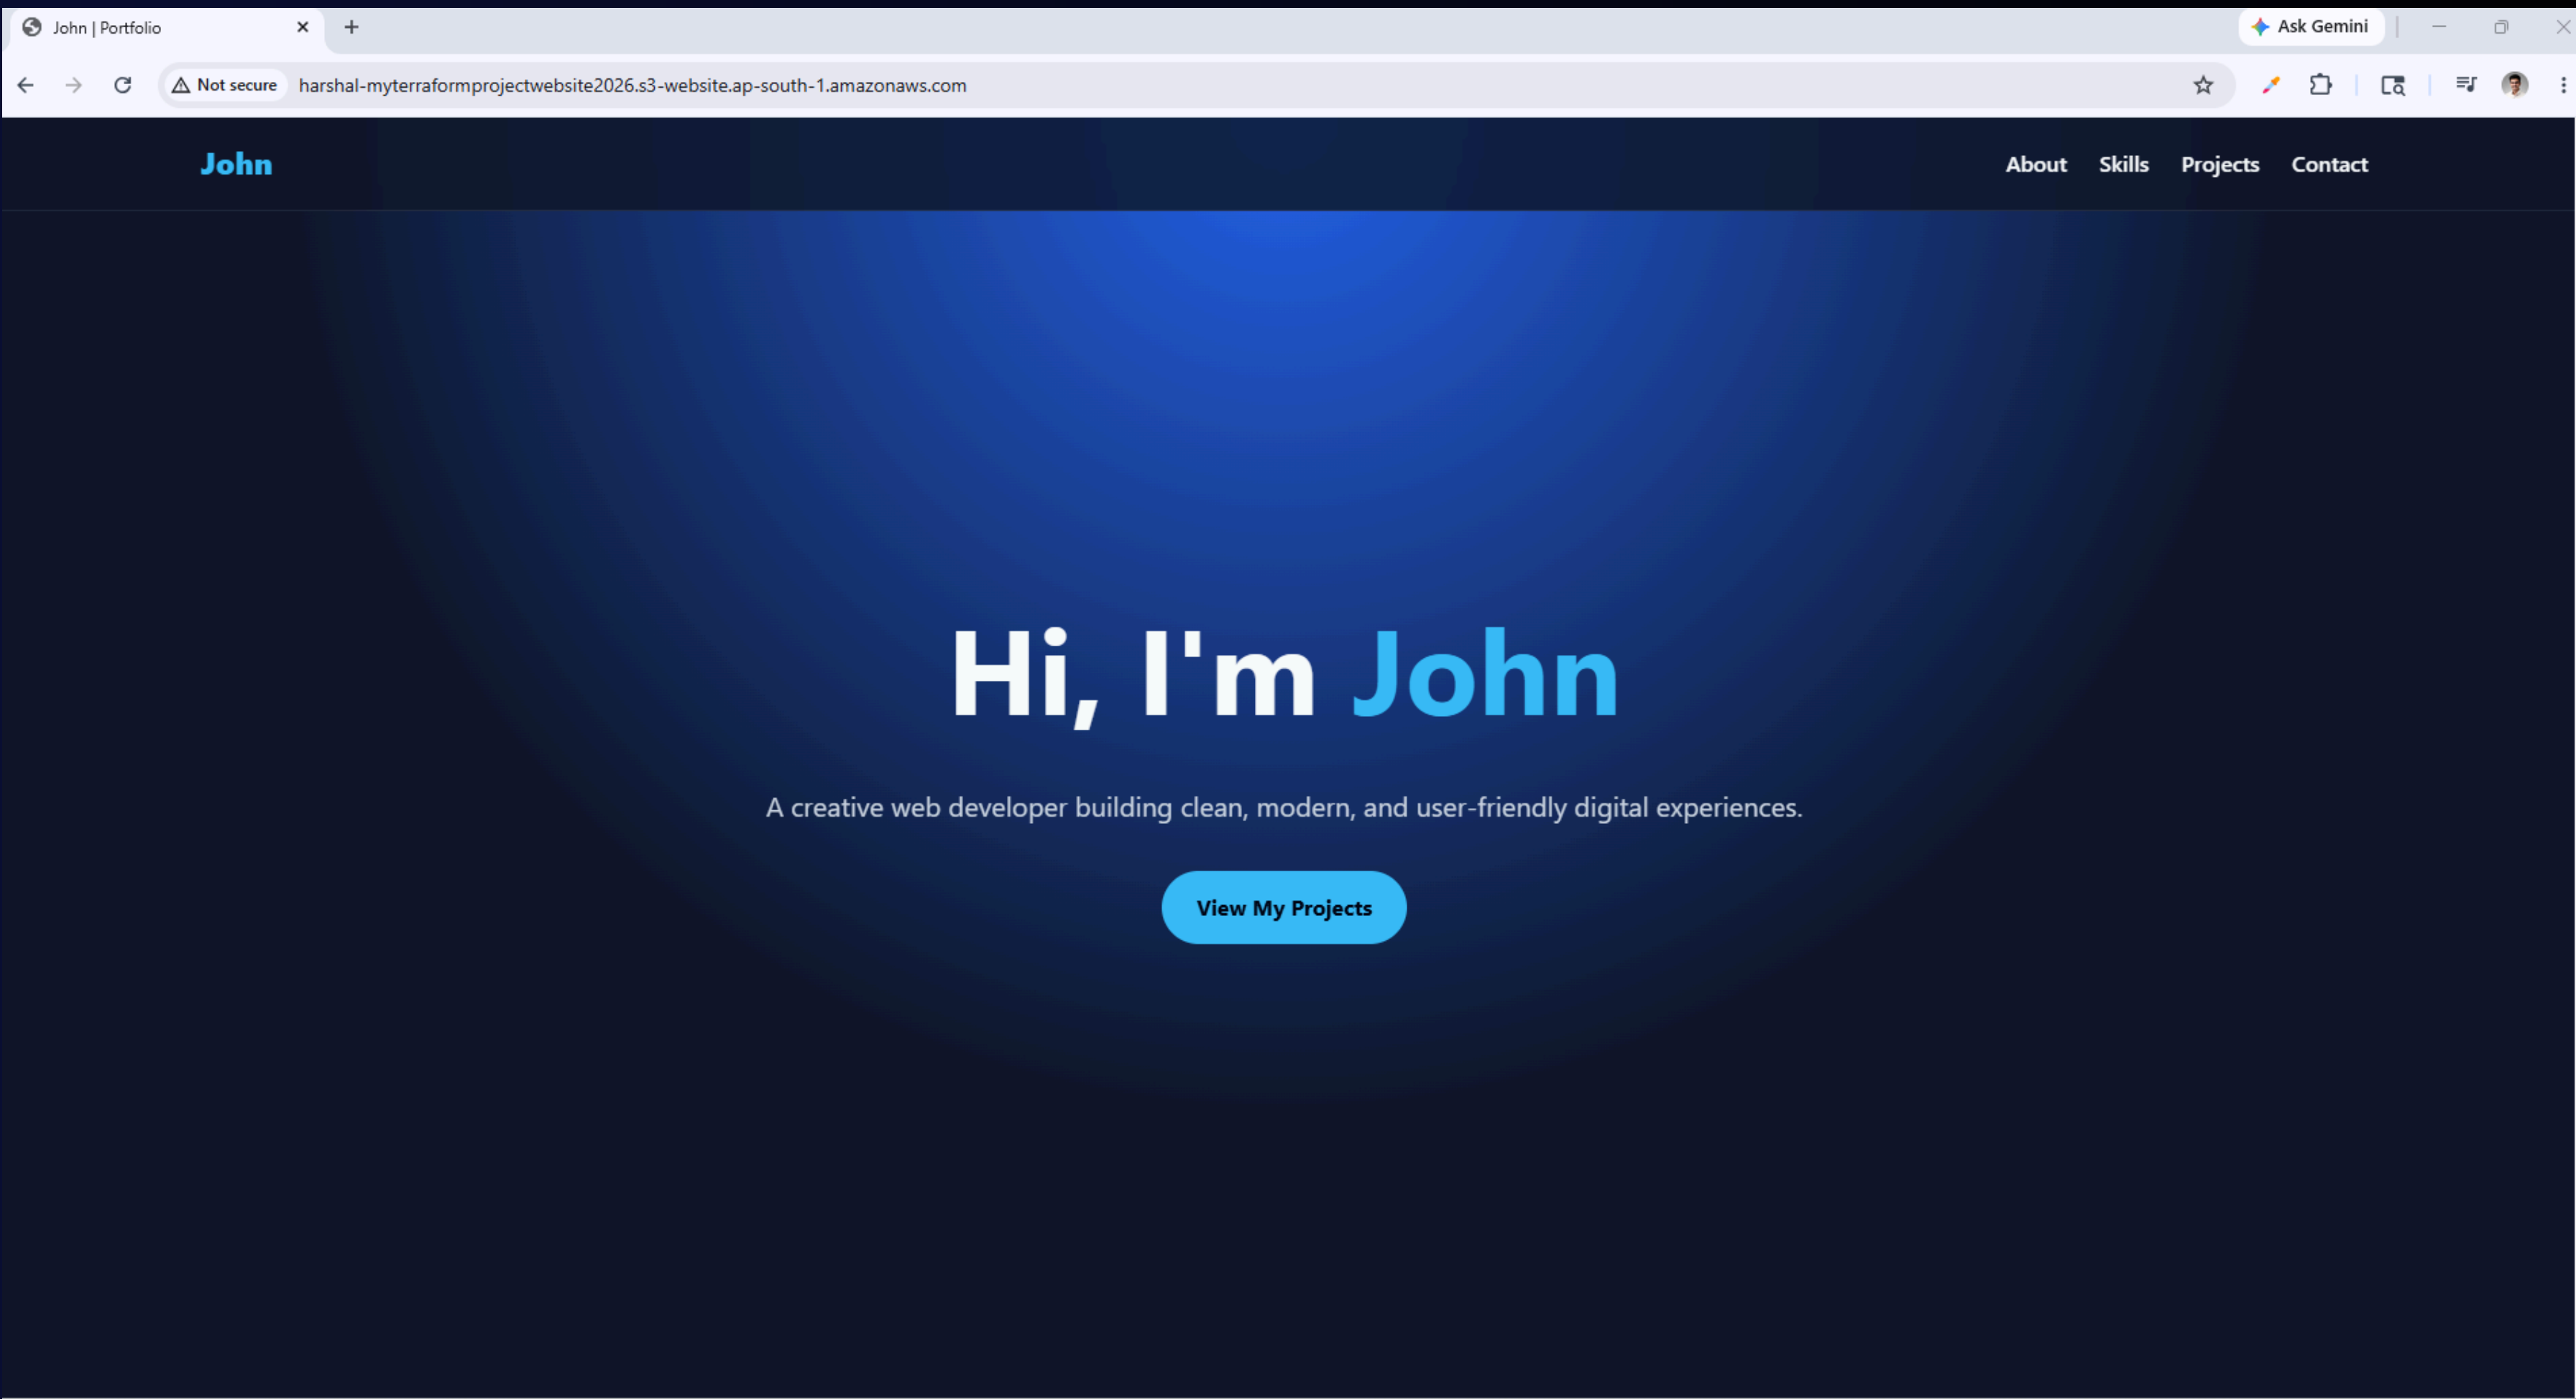

- > .terraform
- 🔒 .terraform.lock.hcl
- 📄 error.html
- 📄 index.html
- 🏹 main.tf
- 🏹 provider.tf
- 🔒 terraform.tfstate
- 🔒 terraform.tfstate.backup
- 🏹 variables.tf
